PEGASUS OPERA II: RELEASE OF V6.50.00

Pegasus expects to sign off this release later this week.

It contains significant enhancements including a new Service Management facility. Service Management offers Helpdesk and Service functionality and works with the Sales Pipeline Management (SPM) module. It is designed to provide Helpdesk, Engineer or Resource Scheduling with Contract and Equipment Management. Helpdesk enables users to log calls against a company and individual contacts and track them through to resolution.

Major development has been made on Dashboard, to allow you to create your own items, and with Document Management that allows the capture of machine typed text (OCR) and bulk copying. This latter facility will enable you to reduce paper dependence and achieve a "Greener" approach.

Further details will be provided in due course.
