Established 1980

2008

2008/1001

Computerwise Limited is part of a much larger group with offices in Bromley, Colchester, Portsmouth, and Wimbledon.

This structure provides you with the stability and expertise that a large company can offer whilst coupling it with the care and responsiveness exercised by a smaller concern.

NEW DEVELOPMENTS (AND A SPECIAL WELCOME)

You may well have spoken to our new Support member of staff over the last few weeks ~ Patrick Abbott. Patrick joined us from Strident, a Suffolk based reseller, and is an experienced Pegasus Opera II and XRL support engineer.

At the time of Patrick's arrival we also acquired the Strident's Opera II client base, and we would like to extend a warm welcome to them all, and hope that we have a long and successful association.

These acquisitions by Computerwise Limited further enhance our position of being one of the principal resellers in the country. It not only increases our authority and influence with Pegasus Software, but strengthens our Support Department and experience.

A well deserved promotion has been given to Tim Tarleton; Tim has taken over as System Support Manager which means that our engineers will report directly to him, and he will be responsible for all scheduling of work and new installations within this department. This will then allow Steve Barningham to concentrate on investigating and testing new products along with laying down procedures on how new and existing products should be implemented.

And finally, it is nice to report that Will Chaytor, a systems engineer with a number of years experience, has joined Tim's team. This addition will further augment our existing Engineering and Network Management Team.

PEGASUS OPERA II: RELEASE V6.50.00

As mentioned in our last newsletter, Pegasus has now signed off the above release. It is our intention to bring all Opera II sites up to this release once it has passed our own accreditation. Accordingly, we will be looking to distribute postal upgrades during the next couple of weeks, and to arrange site visits with customers whose contracts call for one of our support staff to carry out the upgrade in situ.

This version represents a significant enhancement, providing compatibility with Windows Vista and XP, uplift to Microsoft Visual FoxPro 9, extensive developments in Financials, Supply Chain, Executive Dashboard, Sales and Service Management, Document Management, and XRL Reporting. Early implementation is recommended.

PEGASUS CAPITAL GOLD PAYROLL: RELEASE V3.78.00

Although primarily a maintenance release, this version includes a number of enhancements including a change to KIT (keeping in touch) days, Year End Copy Company, SSP1 Form ~ Improved Warning, P46 In-Year movements (Students) and P45 Report changes. We will be testing this release and will inform you next month of the outcome.

STOP IT!

We hope that you find our e-mailed information sheets of direct help to you and your business. However, if you wish to remove your name from the mailing list or make changes regarding recipients, please contact John Stannard, in the Support Department.
